

## Lofts with 85" Legs, 9" Double Bookshelf Posts and 8' Ceiling

For lofts with 85" tall loft legs and an 8' ceiling we provide 9" bookshelf sides.

The top shelf can be mounted to the top of the legs as described in the assembly instructions. To add the lower shelf you will need to measure down 7" below the top 2x4x5-1/2" shelf supports and mount the lower 2x2x5-1/2" as shown in the picture.

The easiest way to do this is to mount the 9" sides and supports first, do not install the bookshelf yet. Measure down 7" from the bottom of the 2x4x5-1/2" and mount the 2x2x5-1/2" using 2-1/2" screws.

Now attach the lower bookshelf using 1-5/8" screws, then mount the upper bookshelf and add the backboards for each shelf.
