

Custom Double Bookshelf and Solid Headboard Installation Instructions

Depending on the width of your bed we have special instructions for installing the Double Bookshelf and the Solid Headboard to the legs of the bed.

The first image below shows the front view. The solid headboard may be either one or two pieces depending on the size. The 2x2x5-1/2" End Support and the Center Support pieces will have pencil marks to indicate where they need to be placed. The 2x2x5-1/2" End Supports are installed from the inside of the legs with 2-1/2" screws. The Center Support is attached from behind the Solid Headboard.

The back of the Solid Headboard will have labels indicating what size screw to use.
