

Pipe Ladder Assembly Instructions

11/11/21

The Pipe Ladders may be installed either on the Vertical Front Ladder (using 12" Pipe Sections) or to the Built-In End Ladder Rungs (using 18" Pipe Sections).

Please note there will be some oil residue on the pieces (from the manufacturing process). We recommend you wash the pieces with any type of household cleaner before installation.

Assemble the pieces as shown below, tighten the pieces as tight as possible by hand.

<= Pipe Ladder is attached to the Built-In End Ladder Rungs.

Attach the Pipe Ladder to the Rungs as shown in this photo. Use the 1/8" drill bit to pre-drill pilot holes to prevent the wood from splitting.

<= 18" Pipe Section for the Built-In End Ladder

12" Pipe Section for the Vertical Front Ladder

(4) Pipe Ladders

___ (4) Pipe Sections 12" / 18"

___ (8) Elbows
