

# SP - Side Platform Assembly Instructions

The SP Side Platform is customized for height, length and number of shelves based on your specifications. Assembly is the same regardless of your specifications. Shown below is the SP that goes the width of the bed with (1) Shelf. The SP can be attached at either end of the bed. The SP Top & Frame is pre-assembled. The Angled Ladder is also pre-assembled.

**All screw attachments are made from inside & underneath the frame using 2-1/2" screws into the pilot holes. After installation, no screws will be visible from the outside the bed.**

Place the SP Top & Frame upside down on the floor. Attach the SP Legs to the Frame as shown in the photo below. The legs are notched with the taller end going inside the frame.

Attach the SP Top & Frame to the rung. The overhang top goes on top of the rung.

If you ordered shelves attach them to the rung and SP Legs. The overhang top goes on top of the rung.

Attach the Angled Ladder to the SP Frame with 2-1/2" screws from underneath inside the frame.
