

Room Planner & Design Guide

Need help designing your bedroom? Use the grid shown below to layout where the bed will best fit in your room. Print the grid and cut out the bed size you are going to use to place it on the grid. Make sure you mark all walls, doors, windows, closets and any other furniture that will be in the room. Each square on the grid is 6". The overall grid is for a 12' x 12' room. If you have a larger room you can tape two grids together. When measuring your walls measure baseboard-to-baseboard and not wall-to-wall. The dimensions shown below are for lofts and bunks.

Also please send us various photos of the room and where you want to place the bed in the room.

Scan the drawing or take a picture of it and email it to us at: info@CollegeBedLofts.com. We accept jpg and pdf files.

Ceiling Height: _____ **Mattress Thickness:** _____

Bed Footprint

Twin 44" x 79"

Twin-XL 44" x 84"

Bed Footprint

Full 59" x 79"

Full-XL 59" x 84"

Bed Footprint

Queen 65" x 84"

**Note: For the Open-Ends
Bed add 1" to the length.**
